Digital Responsibility and Citizenship

Digital responsibility refers to the way in which we use digital technologies in a safe, ethical, and respectful way. It involves understanding the impact of our online actions and making informed decisions to protect ourselves and others. Students need opportunities to learn about the pros and cons of using technology from an individual perspective and an outward looking community perspective. Grade 6 and 7 is a time when students are far more independent in the use of their personal digital devices, so the importance of being a responsible digital citizen cannot be understated.

Do you know what your child is doing online, who they are engaging with and how much time they are spending on a device?

- Smart**, Share with Care
- Alert**, Don't Fall for Fake
- Strong**, Secure Your Secrets
- Kind**, It's Cool to Be Kind
- Brave**, When in Doubt, Talk It Out
